

ARCHITECTURE PROFILE

MBM Mediterranean Building Materials

Established in Abu Dhabi, UAE in 1992, MBM has since become a key player and leader in the supply and installation of varying products and services including a diverse range of Architectural items for both exterior and interior requirements. Over this period of time, MBM has been working with established manufacturers across the world to provide sustainable solutions for the ever-growing Middle Eastern construction industry.

“ THE KEY ELEMENT THAT DIFFERENTIATES GREAT FROM AVERAGE ARCHITECTURE LIES IN THE ATTENTION GIVEN TO THE SMALLEST DETAILS ”

Technical Experts

In addition to providing highly technical solutions to various architectural needs, MBM's highly experienced team of engineers and architects are always ready to provide its clients with the highest quality and value for money products whether the project is in the private or public sector. MBM also handles full responsibility to supply, procure, deliver, install and maintain its full spectrum of products.

Auditorium Seats

have been part of our portfolio since the onset and we have executed hundreds of projects with a variety of different suppliers located in Europe and the United States. MBM is capable of catering to all project requirements depending on the finishing level of the space with a wide range of finishing options for both the seat and the structure.

Production Capacity

We are proud to be capable of handling projects regardless of the capacity. Just to name a few of the projects selected from a reference list containing hundreds of different projects including,

Emirates Transport

Kent College

Gems American Academy

Emirates Aviation College

Higher Colleges of Technology, Ras Al Khaimah

New York University, Abu Dhabi

AUDITORIUM SEATS

FLAWLESS MECHANISM

Telescopic Platforms

Fundamentally allow for spaces to be turned into multipurpose halls. This application is particularly popular in sports halls and convention centers. MBM has become the regional expert in this type of application with the capacity to supply and install platforms with different types of seating systems, operating mechanisms and sizes. we are proud to note that we are able to provide solutions that are suitable from the basic applications of elementary schools up to the aesthetic requirements of high end theaters.

TELESCOPIC PLATFORMS

Technically Superior

It is with no doubt that this item is of the most technically complex systems MBM works with. The importance of a superior quality mechanism and system is of utmost priority. Since MBM started working with Telescopic platforms, we have successfully implemented hundreds of platforms all over the Middle East giving our clients nothing but excellence. References include:

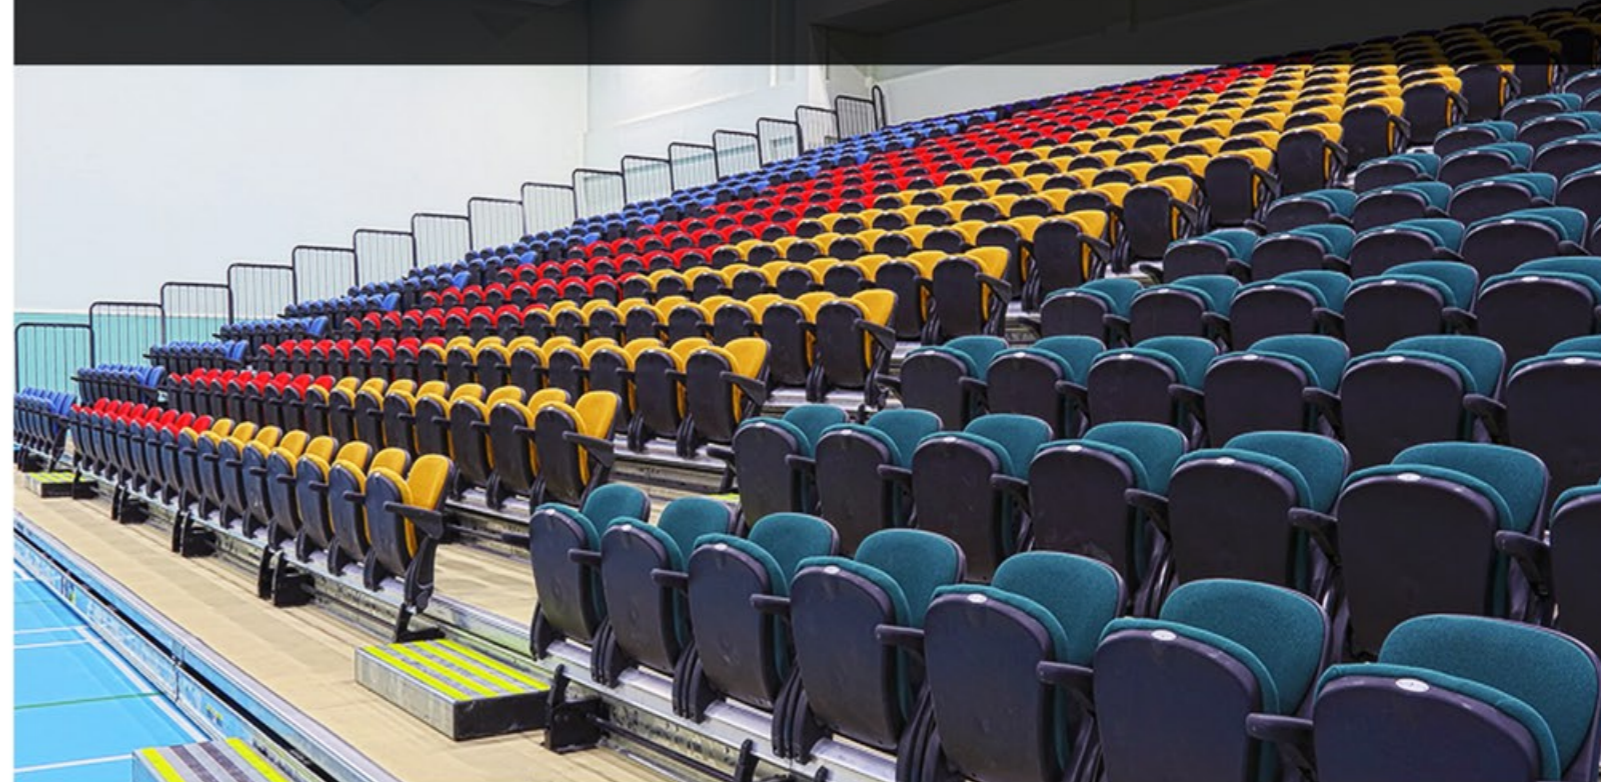

KAPSARC, KSA

Ras-Al-Hamra Int. School, Oman

Gems American Academy, Al Barsha

Abu Dhabi Future schools, Phase 3, 4, 5 & 6

Cranleigh School, Saadiyat Island

Operable Walls

This system allows for large areas of space to be divided based on different events and requirements. MBM supplies and installs Operable walls in various heights, finishes and operations modes (manual or electrical). We are also able to reach the highest levels of acoustic and fire rating properties with a diversity of finishes.

STRONG AND SUPERIOR

OPERABLE WALLS

Design Requirements

This type of system is a technically critical one and proper consideration must be given to how the partitions will be supported. Thanks to our expertise and experience with this system, we are proud to have our Operable Walls in the following projects:

Southern Sun Hotel, Abu Dhabi

EXPO Centre, Sharjah

Abu Dhabi Accountability Authority
Headquarters

Abu Dhabi National Exhibition Center

Dubai Convention Center

St. Elias Church

Saadiyat Island Resort Development

NANO - POLYMER MOSAICS

Mosaics

A unique and patented type of Nano-polymer that transforms any image into mosaics of any pattern. The light weight nature of the cladding material allows the system to be applied onto walls, ceilings, furniture, pools or any surface seen fit. The sky is the limit with regards to the diverse use of such a product from creating contemporary textures to Arabic patterns or even transforming full pledged artwork into the mosaics.

INVISIBLE DOORS

Invisible Doors

A luxurious, patented, unique and high-end Italian system by L'INVISIBLE, catered towards designers and clients wanting to enhance their interior spaces with this flush door. The frame is built during the construction phase of the project allowing it to be completely embedded into the wall, creating a perfectly flush door with all accessories completely hidden. pivot, hinged, sliding and pocket doors with a variety of finishes ranging from lacquer, wood veneer, paint, metallic and stone to marble and leather finishes.

Mubarak Al Khaldoon Villa

Muraba, Palm Island

Tabari Villa, Arabian Ranch

PRACTICAL SOLUTION

Toilet Cubicles

Completely manufactured in the UAE, we offer an excellent item for all public restroom spaces whether in gyms, malls or regular commercial areas. We offer four different lines (Elite, Eminence, Excellence, Elegance) depending on the project requirements. Our standard accessories range within PVC and Stainless steel of 304 or 316 grade including an option for customized accessories.

TOILET CUBICLES

Economical Solutions

The high quality material of the panels that form the cubicles are completely water and humid resistant whilst clearing any needs for concrete walls to act as dividers, saving a relatively good amount of space. With decades of various projects executed all over the middle East, this system has well proven its place in the market today.

Abu Dhabi Mall

The Country Club

Kent College

Ray Lockers

Locally manufactured with high standards recommended for environments such as public swimming pools, spa centers, schools, offices and other places where ease of maintenance and cleaning are vital. Rays lockers are also resistant to abrasion and fire which makes it suitable for high traffic areas.

PRACTICAL SOLUTION

RAY LOCKERS

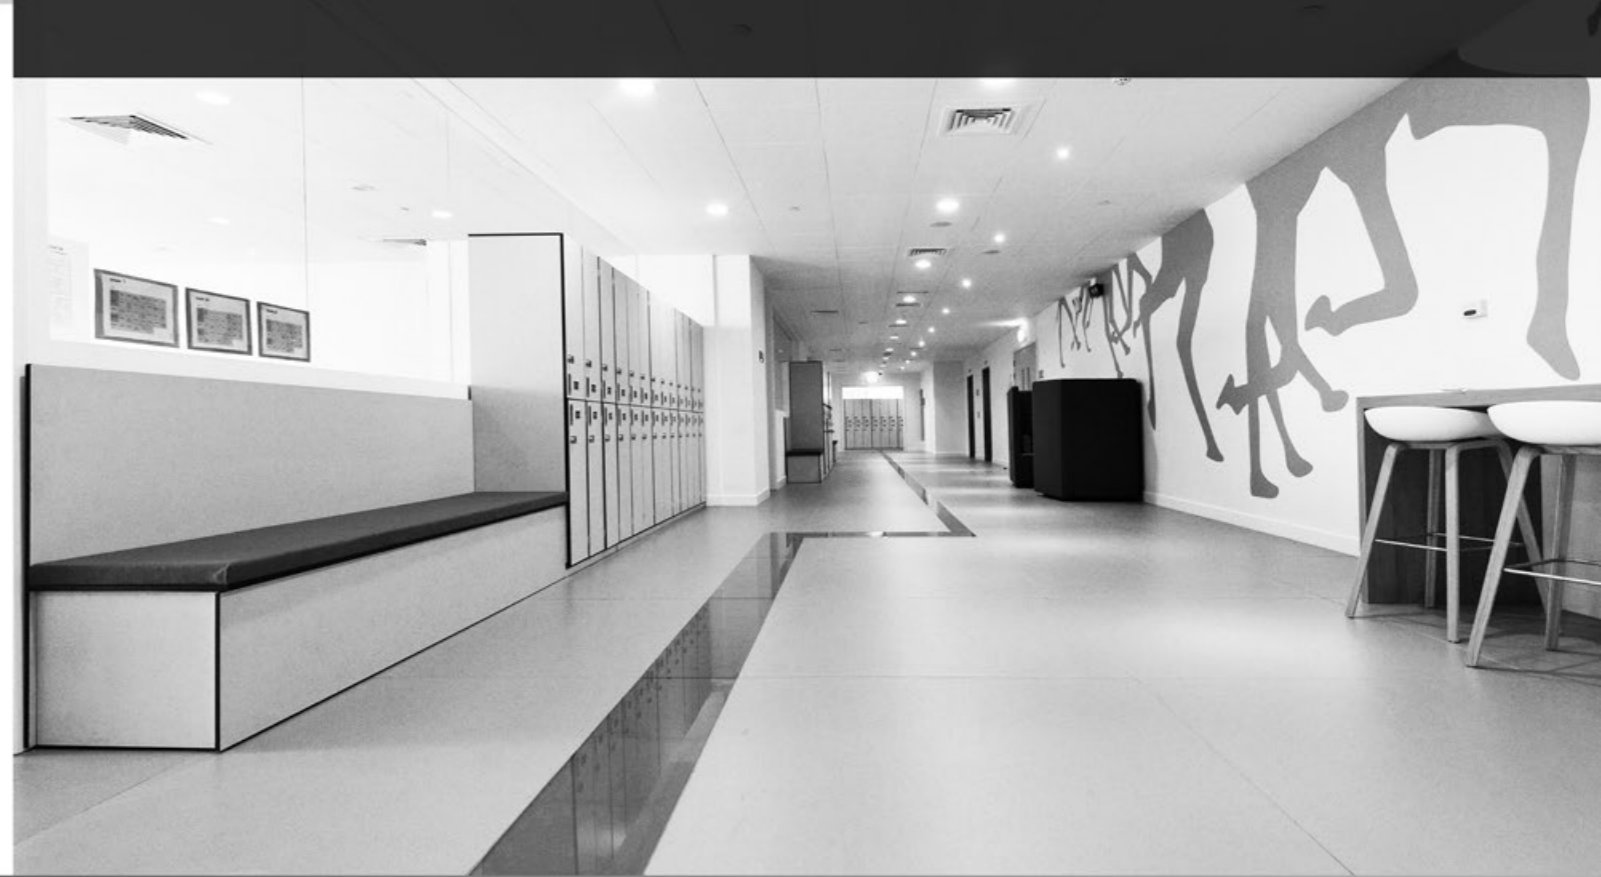

Economical Solutions
